One CT-402 atomized cartridge can have 100 mouthfuls, equivalent to have package of ordinary cigarette
 And the CT-401 atomized cartridge can have 60 mouthfuls. The nicotine content is much lower than ordinary cigarette. According to nicotine content, the atomized cartridges are classified into four kinds:

- Nicotine content: High - will give you 1/6 nicotine content of a normal cigarette
- Nicotine content: Medium - will give you 1/10 nicotine content of a normal cigarette
- Nicotine content: Low - will give you 1/12 nicotine content of a normal cigarette
- Nicotine content: Non - will give you no nicotine but still real tobacco flavour
